Frank Burk

#### A Garden of Integrals (Dolciani Mathematical Expositions) Frank Burk

The derivative and the integral are the fundamental notions of calculus. Though there is essentially only one derivative, there is a variety of integrals, developed over the years for a variety of purposes, and this book describes them. No other single source treats all of the integrals of Cauchy, Riemann, Riemann-Stieltjes, Lebesgue, Lebesgue-Steiltjes, Henstock-Kurzweil, Weiner, and Feynman. The basic properties of each are proved, their similarities and differences are pointed out, and the reason for their existence and their uses are given. There is plentiful historical information. The audience for the book is advanced undergraduate mathematics majors, graduate students, and faculty members. Even experienced faculty members are unlikely to be aware of all of the integrals in the Garden of Integrals and the book provides an opportunity to see them and appreciate their richness. Professor Burks clear and well-motivated exposition makes this book a joy to read. The book can serve as a reference, as a supplement to courses that include the theory of integration, and a source of exercises in analysis. There is no other book like it.

#### From reader reviews:

#### Jose Carr:

The book A Garden of Integrals (Dolciani Mathematical Expositions) can give more knowledge and information about everything you want. Why then must we leave the best thing like a book A Garden of Integrals (Dolciani Mathematical Expositions)? A few of you have a different opinion about book. But one aim which book can give many information for us. It is absolutely right. Right now, try to closer with the book. Knowledge or details that you take for that, you are able to give for each other; you are able to share all of these. Book A Garden of Integrals (Dolciani Mathematical Expositions) has simple shape however, you know: it has great and big function for you. You can seem the enormous world by open and read a ebook. So it is very wonderful.

#### **Charlotte Bernstein:**

Now a day individuals who Living in the era where everything reachable by connect with the internet and the resources inside it can be true or not call for people to be aware of each details they get. How many people to be smart in getting any information nowadays? Of course the reply is reading a book. Studying a book can help folks out of this uncertainty Information particularly this A Garden of Integrals (Dolciani Mathematical Expositions) book because book offers you rich details and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you probably know this.

#### **Richard Broderick:**

Exactly why? Because this A Garden of Integrals (Dolciani Mathematical Expositions) is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will surprise you with the secret it inside. Reading this book beside it was fantastic author who else write the book in such amazing way makes the content inside of easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of benefits than the other book have got such as help improving your expertise and your critical thinking means. So , still want to hold off having that book? If I were you I will go to the reserve store hurriedly.

#### Theresa Kuykendall:

Many people said that they feel bored stiff when they reading a book. They are directly felt the idea when they get a half regions of the book. You can choose often the book A Garden of Integrals (Dolciani Mathematical Expositions) to make your own reading is interesting. Your skill of reading proficiency is developing when you including reading. Try to choose very simple book to make you enjoy to learn it and mingle the sensation about book and studying especially. It is to be initial opinion for you to like to wide open a book and learn it. Beside that the reserve A Garden of Integrals (Dolciani Mathematical Expositions) can to be a newly purchased friend when you're sense alone and confuse in what must you're doing of their time.
