Sage est un logiciel libre de calcul mathématique s'appuyant sur le langage de programmation Python. Ses auteurs, une communauté internationale de centaines d'enseignants et de chercheurs, se sont donné pour mission de fournir une alternative viable aux logiciels Magma, Maple, Mathematica et Matlab. Sage fait appel pour cela à de multiples logiciels libres existants, comme GAP, Maxima, PARI et diverses bibliothèques scientifiques pour Python, auxquels il ajoute des milliers de nouvelles fonctions. Il est disponible gratuitement et fonctionne sur les systèmes d'exploitation usuels. Pour les lycéens, Sage est une formidable calculatrice scientifique et graphique. Il assiste efficacement l'étudiant de premier cycle universitaire dans ses calculs en analyse, en algèbre linéaire, etc. Pour la suite du parcours universitaire, ainsi que pour les chercheurs et les ingénieurs, Sage propose les algorithmes les plus récents dans diverses branches des mathématiques. De ce fait, de nombreuses universités enseignent Sage dès le premier cycle pour les travaux pratiques et les projets. Ce livre est le premier ouvrage généraliste sur Sage, toutes langues confondues. Coécrit par des enseignants et chercheurs intervenant à tous les niveaux (IUT, classes préparatoires, licence, master, doctorat), il met l'accent sur les mathématiques sous-jacentes à une bonne compréhension du logiciel. En cela, il correspond plus à un cours de mathématiques effectives illustré par des exemples avec Sage qu'à un mode d'emploi ou un manuel de référence. La première partie est accessible aux élèves de licence. Le contenu des parties suivantes s'inspire du programme de l'épreuve de modélisation de l'agrégation de mathématiques. Ce livre est diffusé sous licence libre Creative Commons. Il peut être téléchargé gratuitement depuis <http://sagebook.gforge.inria.fr/>.

From reader reviews:

George Cornelius:

In this 21st one hundred year, people become competitive in every single way. By being competitive at this point, people have to do something to make these individuals survive, being in the middle of the crowded place and notice by simply surrounding. One thing that often many people have underestimated that for a while is reading. Yes, by reading a e-book your ability to survive enhance then having chance to stay than other is high. In your case who want to start reading some sort of book, we give you this specific Calcul mathématique avec Sage (French Edition) book as nice and daily reading book. Why, because this book is more than just a book.

Diana Pearson:

Exactly why? Because this Calcul mathématique avec Sage (French Edition) is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will zap you with the secret the idea inside. Reading this book adjacent to it was fantastic author who else write the book in such wonderful way makes the content inside of easier to understand, entertaining means but still convey the meaning fully. So , it is good for you for not hesitating having this anymore or you going to regret it. This book will give you a lot of gains than the other book get such as help improving your talent and your critical thinking means. So , still want to hold off having that book? If I were you I will go to the book store hurriedly.

Denise Niemi:

In this age globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher that print many kinds of book. The actual book that recommended to you personally is Calcul mathématique avec Sage (French Edition) this reserve consist a lot of the information on the condition of this world now. This particular book was represented so why is the world has grown up. The words styles that writer use for explain it is easy to understand. The particular writer made some research when he makes this book. Here is why this book ideal all of you.

Kathleen Duff:

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some reserve, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the professor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that examining is not important, boring and can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we

know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Calcul mathématique avec Sage (French Edition) can make you truly feel more interested to read.
