**Communication Issues In Autism And Asperger Syndrome: Do We Speak The Same Language?** Olga Bogdashina

Providing a theoretical foundation for understanding communication and language impairments specific to autism, Olga Bogdashina explores the effects of different perceptual and cognitive styles on the communication and language development of autistic children. She stresses the importance of identifying each autistic individual's nonverbal language - which can be visual, tactile, kinaesthetic, auditory, olfactory or gustatory - with a view to establish a shared means of verbal communication. She offers an explanation of why certain approaches, for example PECS, might work with some autistic children but not others. Offering real insights, the 'What They Say' sections enable the reader to see through the eyes of autistic individuals and to understand their language differences first hand.
