Today, economic growth is widely understood to be conditioned by productivity increases which are, in turn, profoundly affected by innovation. This volume explores these key relationships between innovation and growth, bringing together experts from both fields to compile a unique *Handbook*.

The *Handbook* considers innovation from fresh perspectives, encompassing topics such as services innovation, inward investment and innovation, creative industry innovation and green innovation. It is divided into seven sections, dealing with regional innovation and growth theory, dynamics, evolution, agglomeration, innovation 'worlds', innovation system institutions, and innovation governance and policy.

This definitive compendium on regional innovation and growth will undoubtedly appeal to teachers, students, researchers and practitioners of innovation and growth dynamics worldwide.
