**A book for anyone who has a shed, a back garden, or a space big enough to put one up**

This book offers those who may be thinking of building their own own shed practical constructional advice and use of materials; all of the sheds in the book have actually been built, and are not just ideas. It contains interesting stories about the shed owners and how they overcame problems or how they found unusual, cheap solutions (such as the use of old printing plates for roofing). Each shed, and its contents, gives an interesting insight into its owner's character.
