ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you **select the correct ISBN**. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, **you may need a CourseID**, provided by your instructor, to register for and use Pearson's MyLab & Mastering products.

Packages

Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase.

Used or rental books

If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code.

Access codes

Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase.

--

This extensively-updated text is designed to promote excellence in pediatric nursing care, in both acute care settings and in the community. **CHILD HEALTH NURSING, 3/e focuses on helping students synthesize new knowledge, apply evidence-based findings, collaborate with children, families, and other healthcare professionals, and use clinical reasoning to plan superior care. It views families as integral participants in all care, and recognizes that all children need health promotion and maintenance interventions, wherever they seek care or whatever conditions they are experiencing. This edition uses current NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020 recommendations. Sample nursing care plans help students apply developmental, psychosocial, and physiologic concepts to the care of children with specific conditions. Research, clinical reasoning, and evidence-based practice are emphasized and integrated throughout, and coverage of contemporary topics ranges from genomics to new pharmacological treatment options.**
