## Newton and Newtonianism: New Studies (International Archives of the History of Ideas Archives internationales d'histoire des idées)

Sir Isaac Newton's pre-eminence in the history of science remains fixed, yet the picture which we have of the whole man, and of the influence of his wide-ranging intellect, has been changing rapidly as scholars have increasingly taken cognizance of those aspects of Newton's thought hitherto hidden in his unpublished manuscripts. At the start of the third millennium, we find ourselves poised to launch the greatest revolution yet in Newton studies as an international team of scholars has been assembled to publish all of Newton's widely scattered unpublished papers. The William Andrews Clark Memorial Library has been associated with the world of Newtonian scholarship for some years through its purchase, in 1961, of an important manuscript ("Paradoxical Questions concerning the morals & Actions of Athanasius & his followers") and through its long association with Professor Richard H. Popkin (U. C. L. A. ) and Professor James E. Force (University of Kentucky). Through the generous sponsorship of both the U. C. L. A. Center for 17 - and 18 -Century Studies and the U. C. L. A. William Andrews Clark Memorial Library - which are under the direction of Professor Peter H. Reill - Professors Force and Popkin were able to stage a series of Clark Library conferences devoted to Newton throughout the 1990s. The papers delivered at these conferences evolved into a series of important edited volumes whose general theme was the centrality of theological and religious ideas to Newton's intellectual formation. In the present volume, this longstanding project continues. Once again thanks to the generosity of Professor Reill and the resources of the U. C. L. A.
