**Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water** Jerry M. Neff

Large volumes of produced water are generated and discharged to the coastal and ocean waters worldwide from offshore oil and gas production facilities. There is concern that the chemicals in the produced water may harm marine ecosystems. This book summarizes the bioavailability and marine ecotoxicology of metal and organic contaminants that may occur in oil well produced water at concentrations significantly higher than those in ambient seawater. The contaminants of concern include arsenic, barium, cadmium, chromium, copper, lead, mercury, radium isotopes, zinc, monocyclic aromatic hydrocarbons, polycyclic aromatic hydrocarbons, phenols, and bis (2-ethylhexyl) phthalate. The first part of the book is a detailed discussion of the chemical composition of produced water from offshore oil wells worldwide and its fates following discharge to the ocean. The remaining chapters of the book summarize the current scientific literature on the sources and distributions in the ocean of each of the contaminants of concern and their bioaccumulation and toxicity to marine organisms. This book will be of value to: environmental scientists in the oil and gas industry; marine toxicologists and ecological risk assessors in academia, government, and industry; government regulatory agencies concerned with marine environmental protection. The book advances the concept that bioavailability evaluation must be included in all ecological risk assessments and other environmental assessments of chemical contaminants in marine and freshwater ecosystems.

### **From reader reviews:**

#### **Roger Johnson:**

The book untitled Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water is the reserve that recommended to you to read. You can see the quality of the reserve content that will be shown to you actually. The language that publisher use to explained their way of doing something is easily to understand. The copy writer was did a lot of study when write the book, therefore the information that they share to you is absolutely accurate. You also will get the e-book of Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water from the publisher to make you much more enjoy free time.

#### **William Roger:**

Playing with family in a very park, coming to see the coastal world or hanging out with friends is thing that usually you will have done when you have spare time, in that case why you don't try matter that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water, you can enjoy both. It is great combination right, you still need to miss it? What kind of hang type is it? Oh seriously its mind hangout men. What? Still don't understand it, oh come on its identified as reading friends.

#### **Mary Stockton:**

Beside this Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water in your phone, it could possibly give you a way to get nearer to the new knowledge or data. The information and the knowledge you will got here is fresh from the oven so don't become worry if you feel like an aged people live in narrow town. It is good thing to have Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water because this book offers for your requirements readable information. Do you often have book but you seldom get what it's exactly about. Oh come on, that will not happen if you have this with your hand. The Enjoyable agreement here cannot be questionable, including treasuring beautiful island. Use you still want to miss this? Find this book in addition to read it from at this point!

#### **Nicolas Jones:**

On this era which is the greater individual or who has ability in doing something more are more special than other. Do you want to become considered one of it? It is just simple way to have that. What you need to do is just spending your time not much but quite enough to experience a look at some books. One of many books in the top list in your reading list will be Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water. This book that is certainly qualified as The Hungry Mountains can get you closer in turning into precious person. By looking right up and review this publication you can get many

advantages.
