**Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften)** W. Klingenberg

The question of existence of closed geodesics on a Riemannian manifold and the properties of the corresponding periodic orbits in the geodesic flow has been the object of intensive investigations since the beginning of global differential geometry during the last century. The simplest case occurs for closed surfaces of negative curvature. Here, the fundamental group is very large and, as shown by Hadamard [Had] in 1898, every non-null homotopic closed curve can be deformed into a closed curve having minimal length in its free homotopy class. This minimal curve is, up to the parameterization, uniquely determined and represents a closed geodesic. The question of existence of a closed geodesic on a simply connected closed surface is much more difficult. As pointed out by Poincaré [po 1] in 1905, this problem has much in common with the problem of the existence of periodic orbits in the restricted three body problem. Poincaré [l.c.] outlined a proof that on an analytic convex surface which does not differ too much from the standard sphere there always exists at least one closed geodesic of elliptic type, i. e., the corresponding periodic orbit in the geodesic flow is infinitesimally stable.

### **From reader reviews:**

#### **Leopoldo Gonzalez:**

Inside other case, little persons like to read book Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften). You can choose the best book if you'd prefer reading a book. So long as we know about how is important the book Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften). You can add expertise and of course you can around the world by just a book. Absolutely right, since from book you can know everything! From your country right up until foreign or abroad you will find yourself known. About simple issue until wonderful thing you can know that. In this era, we are able to open a book or even searching by internet device. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's go through.

#### **Robert Carlson:**

This Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften) are generally reliable for you who want to be a successful person, why. The main reason of this Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften) can be on the list of great books you must have is usually giving you more than just simple reading through food but feed you actually with information that might be will shock your earlier knowledge. This book is actually handy, you can bring it everywhere you go and whenever your conditions in the e-book and printed versions. Beside that this Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften) forcing you to have an enormous of experience like rich vocabulary, giving you demo of critical thinking that we all know it useful in your day pastime. So , let's have it and enjoy reading.

#### **Claudia Fox:**

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book was rare? Why so many issue for the book? But almost any people feel that they enjoy to get reading. Some people likes studying, not only science book but additionally novel and Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften) as well as others sources were given information for you. After you know how the truly amazing a book, you feel would like to read more and more. Science reserve was created for teacher as well as students especially. Those ebooks are helping them to include their knowledge. In additional case, beside science reserve, any other book likes Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften) to make your spare time more colorful. Many types of book like this.

#### **Bonnie Wilson:**

Some people said that they feel bored stiff when they reading a guide. They are directly felt the item when they get a half portions of the book. You can choose the book Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften) to make your reading is interesting. Your personal skill of reading ability is developing when you like reading. Try to choose simple book to make you enjoy to see it and

mingle the opinion about book and studying especially. It is to be initial opinion for you to like to wide open a book and go through it. Beside that the book Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften) can to be a newly purchased friend when you're feel alone and confuse in what must you're doing of the time.
