## Advances in Interdisciplinary Mathematical Research: Applications to Engineering, Physical and Life Sciences (Springer Proceedings in Mathematics & Statistics)

This volume contains the invited contributions to the Spring 2012 seminar series at Virginia State University on Mathematical Sciences and Applications. It is a thematic continuation of work presented in Volume 24 of the Springer Proceedings in Mathematics & Statistics series. Contributors present their own work as leading researchers to advance their specific fields and induce a genuine interdisciplinary interaction. Thus all articles therein are selective, self-contained, and are pedagogically exposed to foster student interest in science, technology, engineering and mathematics, stimulate graduate and undergraduate research, as well as collaboration between researchers from different areas.

The volume features new advances in mathematical research and its applications: anti-periodicity; almost stochastic difference equations; absolute and conditional stability in delayed equations; gamma-convergence and applications to block copolymer morphology; the dynamics of collision and near-collision in celestial mechanics; almost and pseudo-almost limit cycles; rainbows in spheres and connections to ray, wave and potential scattering theory; null-controllability of the heat equation with constraints; optimal control for systems subjected to null-controllability; the Galerkin method for heat transfer in closed channels; wavelet transforms for real-time noise cancellation; signal, image processing and machine learning in medicine and biology; methodology for research on durability, reliability, damage tolerance of aerospace materials and structures at NASA Langley Research Center.

The volume is suitable and valuable for mathematicians, scientists and research students in a variety of interdisciplinary fields, namely physical and life sciences, engineering and technology including structures and materials sciences, computer science for signal, image processing and machine learning in medicine.

### **From reader reviews:**

#### **Ruth McGrath:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite reserve and reading a reserve. Beside you can solve your condition; you can add your knowledge by the reserve entitled Advances in Interdisciplinary Mathematical Research: Applications to Engineering, Physical and Life Sciences (Springer Proceedings in Mathematics & Statistics). Try to make book Advances in Interdisciplinary Mathematical Research: Applications to Engineering, Physical and Life Sciences (Springer Proceedings in Mathematics & Statistics) as your good friend. It means that it can to get your friend when you experience alone and beside that course make you smarter than in the past. Yeah, it is very fortunate for you personally. The book makes you far more confidence because you can know anything by the book. So , we should make new experience in addition to knowledge with this book.

#### **Adele Yeager:**

Within other case, little people like to read book Advances in Interdisciplinary Mathematical Research: Applications to Engineering, Physical and Life Sciences (Springer Proceedings in Mathematics & Statistics). You can choose the best book if you want reading a book. Given that we know about how is important a new book Advances in Interdisciplinary Mathematical Research: Applications to Engineering, Physical and Life Sciences (Springer Proceedings in Mathematics & Statistics). You can add knowledge and of course you can around the world by way of a book. Absolutely right, simply because from book you can recognize everything! From your country till foreign or abroad you may be known. About simple matter until wonderful thing you are able to know that. In this era, you can open a book or searching by internet system. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's learn.

#### **Janet Thaxton:**

Typically the book Advances in Interdisciplinary Mathematical Research: Applications to Engineering, Physical and Life Sciences (Springer Proceedings in Mathematics & Statistics) has a lot of knowledge on it. So when you check out this book you can get a lot of advantage. The book was published by the very famous author. Tom makes some research before write this book. This specific book very easy to read you may get the point easily after reading this book.

#### **Katie Mueller:**

Do you have something that you want such as book? The guide lovers usually prefer to opt for book like comic, small story and the biggest some may be novel. Now, why not seeking Advances in Interdisciplinary Mathematical Research: Applications to Engineering, Physical and Life Sciences (Springer Proceedings in Mathematics & Statistics) that give your enjoyment preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world much better then how they react in the direction of the world. It can't be mentioned constantly that reading addiction only

for the geeky individual but for all of you who wants to always be success person. So , for all you who want to start looking at as your good habit, you may pick Advances in Interdisciplinary Mathematical Research: Applications to Engineering, Physical and Life Sciences (Springer Proceedings in Mathematics & Statistics) become your starter.
