*Learning Modern Algebra* aligns with the CBMS Mathematical Education of Teachers II recommendations, in both content and practice. It emphasizes rings and fields over groups, and it makes explicit connections between the ideas of abstract algebra and the mathematics used by high school teachers. It provides opportunities for prospective and practicing teachers to experience mathematics for themselves, before the formalities are developed, and it is explicit about the mathematical habits of mind that lie beneath the definitions and theorems.

This book is designed for prospective and practicing high school mathematics teachers, but it can serve as a text for standard abstract algebra courses as well. The presentation is organized historically: the Babylonians introduced Pythagorean triples to teach the Pythagorean theorem; these were classified by Diophantus, and eventually this led Fermat to conjecture his Last Theorem. The text shows how much of modern algebra arose in attempts to prove this; it also shows how other important themes in algebra arose from questions related to teaching. Indeed, modern algebra is a very useful tool for teachers, with deep connections to the actual content of high school mathematics, as well as to the mathematics teachers use in their profession that doesn't necessarily "end up on the blackboard."

The focus is on number theory, polynomials, and commutative rings. Group theory is introduced near the end of the text to explain why generalizations of the quadratic formula do not exist for polynomials of high degree, allowing the reader to appreciate the more general work of Galois and Abel on roots of polynomials. Results and proofs are motivated with specific examples whenever possible, so that abstractions emerge from concrete experience. Applications range from the theory of repeating decimals to the use of imaginary quadratic fields to construct problems with rational solutions. While such applications are integrated throughout, each chapter also contains a section giving explicit connections between the content of the chapter and high school teaching.

**From reader reviews:**

**Brent Abramson:**

In this 21st millennium, people become competitive in most way. By being competitive now, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Sure, by reading a book your ability to survive boost then having chance to stay than other is high. In your case who want to start reading a new book, we give you this kind of Learning Modern Algebra: From Early Attempts to Prove Fermat's Last Theorem (Maa Textbooks) (Mathematical Association of America Textbooks) book as beginning and daily reading e-book. Why, because this book is greater than just a book.

**Ola Hellman:**

Exactly why? Because this Learning Modern Algebra: From Early Attempts to Prove Fermat's Last Theorem (Maa Textbooks) (Mathematical Association of America Textbooks) is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will distress you with the secret that inside. Reading this book close to it was fantastic author who else write the book in such remarkable way makes the content interior easier to understand, entertaining method but still convey the meaning completely. So , it is good for you for not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of advantages than the other book possess such as help improving your talent and your critical thinking method. So , still want to hesitate having that book? If I were you I will go to the guide store hurriedly.

**Ricky Bradley:**

Do you have something that that suits you such as book? The reserve lovers usually prefer to pick book like comic, short story and the biggest you are novel. Now, why not attempting Learning Modern Algebra: From Early Attempts to Prove Fermat's Last Theorem (Maa Textbooks) (Mathematical Association of America Textbooks) that give your satisfaction preference will be satisfied by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world far better then how they react when it comes to the world. It can't be stated constantly that reading behavior only for the geeky person but for all of you who wants to always be success person. So , for every you who want to start examining as your good habit, you are able to pick Learning Modern Algebra: From Early Attempts to Prove Fermat's Last Theorem (Maa Textbooks) (Mathematical Association of America Textbooks) become your own starter.

**Troy Kemp:**

This Learning Modern Algebra: From Early Attempts to Prove Fermat's Last Theorem (Maa Textbooks) (Mathematical Association of America Textbooks) is great publication for you because the content which can be full of information for you who all always deal with world and get to make decision every minute. That book reveal it info accurately using great organize word or we can point out no rambling sentences in it.

So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but hard core information with lovely delivering sentences. Having Learning Modern Algebra: From Early Attempts to Prove Fermat's Last Theorem (Maa Textbooks) (Mathematical Association of America Textbooks) in your hand like keeping the world in your arm, data in it is not ridiculous a single. We can say that no publication that offer you world throughout ten or fifteen second right but this guide already do that. So , it is good reading book. Hello Mr. and Mrs. hectic do you still doubt that will?
