## **Advancing Research on Living and Fossil Cephalopods: Development and Evolution Form, Construction, and Function Taphonomy, Palaeoecology, Palaeobiogeography, Biostratigraphy, and Basin Analysis**

Relying on the latest analytical techniques, this all-embracing new reference offers comprehensive coverage of the development, evolution, and morphology of both fossil and living cephalopods. In 34 in-depth chapters a group of 51 international neontologists and paleontologists offer an overview of current methods, data, analyses, and interpretations, and posit suggestions for future research.

With its unparalleled combination of first-rate contributions on living and fossil cephalopods, this book provides researchers and advanced students in paleontology, invertebrate zoology, evolutionary biology, and allied disciplines with a trove of recent data and authoritative interpretations that will immeasurably benefit their own studies.
