Group Technology: Applications to Production Management (International Series in Management Science Operations Research) Inyong Ham, Katsundo Hitomi, Teruhiko Yoshida

Mass production and mass consumption, so far considered virtues in a free economic society, have changed. Various problems have occurred including economic stagnation, energy crisis, shortage of material resources, proliferation of pollution, lack of skilled labor, rapid changes of product design, technical innovation, and others. Moreover, individual manufacturing firms must take steps to adopt multi-product, small-lot-sized (batch type) production as a type of production in order to adapt themselves to a market movement characterized by a diversified and specialty-oriented society and a short product life cycle. The number of manufacturing firms worldwide that use a type of multi-product, small-lot-sized production is expected to increase. This is so even in the United States, which has been said to be a country of mass production. Multi-product, small-lot-sized production has been considered to be a milestone to flow-type mass production, which has been thought to be the most effective production system. Intensive efforts have been made to investigate mass production systems from both theoretical and practical viewpoints. Few studies have been made for multi-product, small-lot-sized production (batch-type manufacturing). Considering the present business circumstances faced with various difficulties, it is strongly required to establish some theories useful for making practically effective and flexible multi-product, small-lot-sized production systems. Several effective approaches to the batch-type manufacturing systems have been developed. Group technology (GT) is one such method that has steadily obtained great interest from progressive manufacturing firms all over the world.

From reader reviews:

Jennifer McNab:

Book is usually written, printed, or highlighted for everything. You can know everything you want by a guide. Book has a different type. As you may know that book is important matter to bring us around the world. Next to that you can your reading ability was fluently. A publication Group Technology: Applications to Production Management (International Series in Management Science Operations Research) will make you to end up being smarter. You can feel much more confidence if you can know about every little thing. But some of you think which open or reading any book make you bored. It's not make you fun. Why they might be thought like that? Have you seeking best book or suited book with you?

Katie Barry:

The reason? Because this Group Technology: Applications to Production Management (International Series in Management Science Operations Research) is an unordinary book that the inside of the book waiting for you to snap the item but latter it will jolt you with the secret the item inside. Reading this book beside it was fantastic author who have write the book in such amazing way makes the content within easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you because of not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of benefits than the other book have such as help improving your ability and your critical thinking technique. So , still want to postpone having that book? If I were being you I will go to the reserve store hurriedly.

James Haney:

Do you really one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try and pick one book that you never know the inside because don't judge book by its include may doesn't work here is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer might be Group Technology: Applications to Production Management (International Series in Management Science Operations Research) why because the excellent cover that make you consider concerning the content will not disappoint you. The inside or content is fantastic as the outside or maybe cover. Your reading 6th sense will directly guide you to pick up this book.

Arthur Warnick:

Beside this kind of Group Technology: Applications to Production Management (International Series in Management Science Operations Research) in your phone, it may give you a way to get nearer to the new knowledge or info. The information and the knowledge you are going to got here is fresh from oven so don't possibly be worry if you feel like an previous people live in narrow commune. It is good thing to have Group Technology: Applications to Production Management (International Series in Management Science Operations Research) because this book offers to you readable information. Do you sometimes have book

but you rarely get what it's interesting features of. Oh come on, that would not happen if you have this in the hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss this? Find this book as well as read it from today!
