Weather and Climate Resilience: Effective Preparedness through National Meteorological and Hydrological Services (Directions in Development) David P. Rogers, Vladimir V. Tsirkunov

The importance of weather, climate, and water information is rising because of the need to minimize growing economic losses, serve more elaborate societal needs, and help countries adapt to climate change. Weather and Climate Resilience highlights recent World Bank experience and offers guidance on good practices that will help modernization efforts.

Sustainable development hinges on the ability to cope with natural hazards and avoid the ensuing disasters that often befall a poorly prepared society. National Meteorological and Hydrological Services (NMHSs) play a vital role as a country's official source of warnings for weather hazards. Together with disaster managers, they play a critical part in reducing the adverse impact of hydrometeorological threats.

In many developing countries, however, underinvestment in infrastructure and operations of NMHSs has left them with limited capacity to inform and warn. These countries are often disproportionately vulnerable to hydrometeorological hazards with many people living in areas exposed to floods, storm surges, extreme temperatures, drought and other dangers.

Weather and Climate Resilience underscores the urgent need to strengthen NMHSs, especially in developing countries, and provides cost-benefit estimates of the return that countries can hope to achieve. It also offers a recommended approach that has been tested and implemented in Europe, Central and South Asia, and other countries.

This book takes an important step in this process by increasing the awareness of development agencies and national governments of the role of World Meteorological Organization (WMO) and NMHSs in reducing the impact of hydrometeorological hazards and improving national economic performance. It synthesizes recent experiences of the World Bank and Global Facility for Disaster Reduction and Recovery (GFDRR), the WMO (World Meteorological Organization), and other development partners.

From reader reviews:

Demarcus Bechtel:

What do you regarding book? It is not important along? Or just adding material when you require something to explain what the ones you have problem? How about your spare time? Or are you busy particular person? If you don't have spare time to do others business, it is make you feel bored faster. And you have free time? What did you do? Every individual has many questions above. They need to answer that question because just their can do which. It said that about guide. Book is familiar in each person. Yes, it is appropriate. Because start from on pre-school until university need this specific Weather and Climate Resilience: Effective Preparedness through National Meteorological and Hydrological Services (Directions in Development) to read.

Sang Weems:

Information is provisions for individuals to get better life, information currently can get by anyone from everywhere. The information can be a information or any news even restricted. What people must be consider whenever those information which is in the former life are difficult to be find than now's taking seriously which one is acceptable to believe or which one often the resource are convinced. If you have the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All those possibilities will not happen with you if you take Weather and Climate Resilience: Effective Preparedness through National Meteorological and Hydrological Services (Directions in Development) as your daily resource information.

Kenneth Clark:

Reading can called brain hangout, why? Because when you are reading a book especially book entitled Weather and Climate Resilience: Effective Preparedness through National Meteorological and Hydrological Services (Directions in Development) your brain will drift away trough every dimension, wandering in each aspect that maybe not known for but surely can become your mind friends. Imaging every word written in a book then become one web form conclusion and explanation that will maybe you never get prior to. The Weather and Climate Resilience: Effective Preparedness through National Meteorological and Hydrological Services (Directions in Development) giving you one more experience more than blown away your brain but also giving you useful facts for your better life within this era. So now let us show you the relaxing pattern here is your body and mind will be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary spending spare time activity?

Joseph Robison:

Many people said that they feel bored stiff when they reading a e-book. They are directly felt that when they get a half portions of the book. You can choose often the book Weather and Climate Resilience: Effective

Preparedness through National Meteorological and Hydrological Services (Directions in Development) to make your own personal reading is interesting. Your own skill of reading skill is developing when you like reading. Try to choose easy book to make you enjoy to learn it and mingle the sensation about book and looking at especially. It is to be very first opinion for you to like to start a book and go through it. Beside that the book Weather and Climate Resilience: Effective Preparedness through National Meteorological and Hydrological Services (Directions in Development) can to be your brand new friend when you're feel alone and confuse in what must you're doing of the time.
